«Considered»

on the methodical council of  
therapeutic disciplines  
Protocol № 4 from 21.01.2020  
Chairman \_\_\_\_\_  
prof. Stanislavchuk M.A.

**Instruction to the station №3.**  
**"Management of emergency conditions in the clinic of internal  
medicine."**

The student must greet and introduce himself, present a student identification card and a route sheet to the teacher at the station.

A student receives an urgent clinical problem.

It is necessary:

- to diagnose an emergency condition,
- to formulate a diagnosis according to modern classifications,
- to indicate the tactics of management of this patient,
- provide emergency care in accordance with the current emergency care algorithm, naming the drug's groups and them representatives.

After completing the assignment or ending the time at the station, return the task to the teacher, pick up your route card with a mark on the station and leave the station.
